

Precinct 9: Roxburgh Park

Wurundjeri Woi-wurrung Country

OPEN SPACE OPPORTUNITIES

5ha

visitable open
space per 1000
people

100%

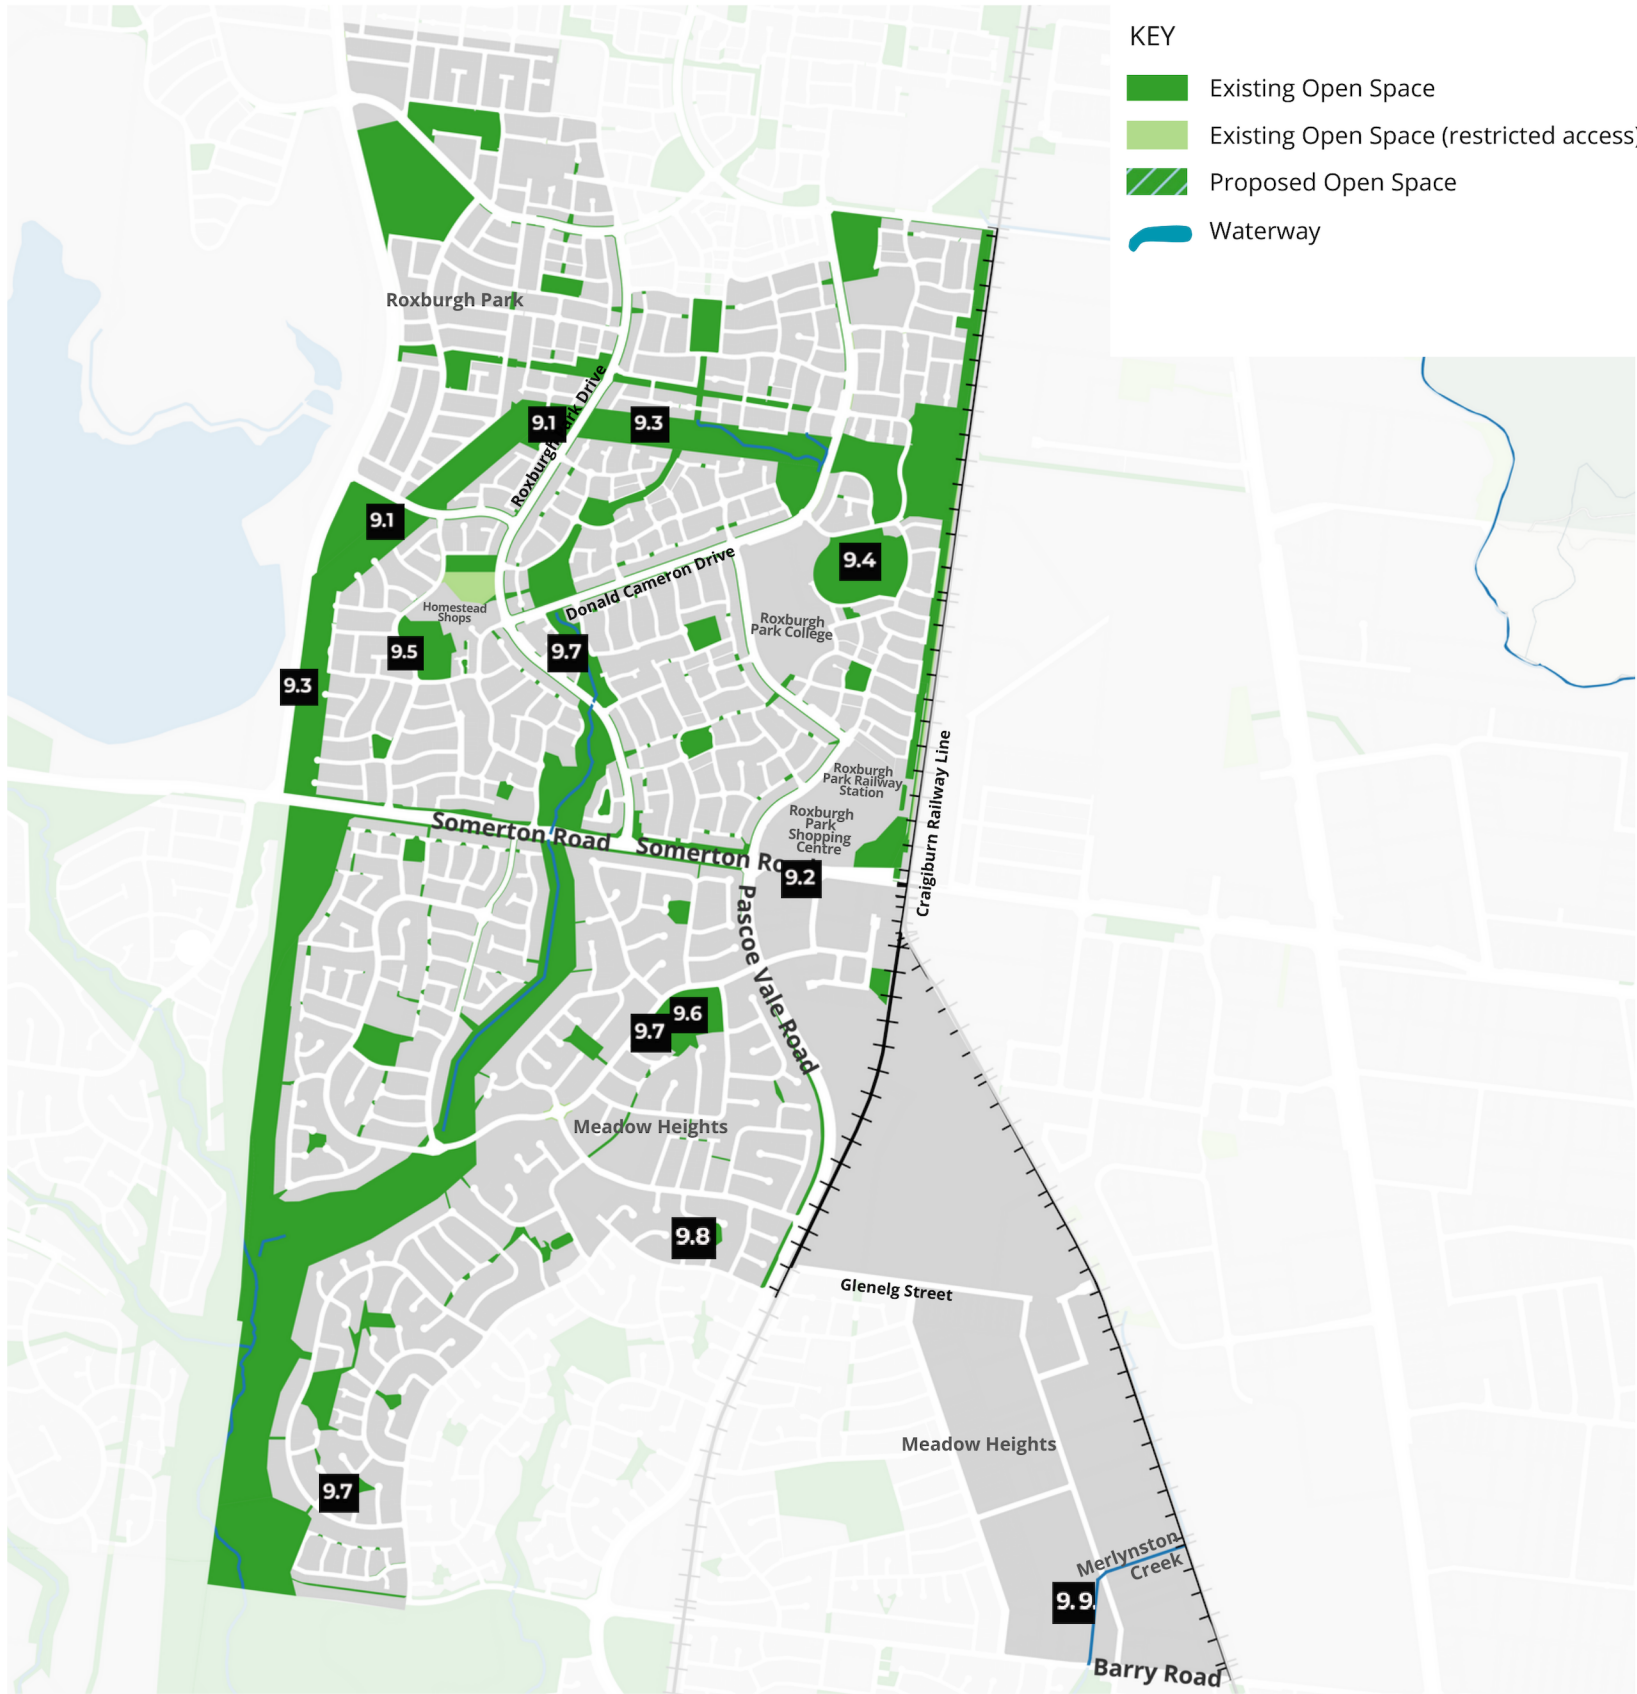

properties
within 400m
of a park

37,900

population
(2021)

37,000

projected
population
(2041)

KEY

- Existing Open Space
- Existing Open Space (restricted access)
- Proposed Open Space
- Waterway

OPTIMISE

Opportunities are examples of potential projects and not a complete list.

The next step is an implementation plan to investigate and prioritise projects.

9.1 Better connections

Investigate options for crossing Roxburgh Park Drive and Silvester Parade.

9.2 Somerton Road Linear Reserve

Expand linear reserve round Somerton Road for walking and cycling.

9.3 Roxburgh Park Linear Reserve

Investigate opportunities to enhance visitor experience such as upgrading trails and landscaping. Investigate easement conditions to identify where pockets can be safely established with shade trees and visitor infrastructure

9.4 Roxburgh Park Recreation Reserve

Investigate upgrading to district play, including picnic shelter space, and improved outdoor gathering capacity.

9.5 Roxburgh Park Homestead

Investigate the opportunity for a district play, picnic shelter space, and improved outdoor gathering capacity.

9.6 Shankland Tarcoola Reserve

Increase play, shade, toilet and picnic provision in keeping with district social recreation standards.

9.7 Oasis Areas

Oasis areas are planted to achieve 70% canopy cover by 2050. For example:

- Shankland Tarcoola (except centre)
- Coram Four Ways Reserve
- Matthews Reserve

GROW

Prioritising land for open space starts with identifying the gaps

9.8 Meadow Heights

To help address the low amount of open space in Meadow Heights, investigate expanding an existing reserve to upgrade the visitor experience and improve visibility.

9.9 Merlynston Creek

Investigate and negotiate creek interface land upstream of Barry Road as an open space corridor.
