OPEN SPACE OPPORTUNITIES

OPTIMISE

Opportunities are examples of potential projects and not a complete list.

The next step is an implementation plan to investigate and prioritise projects.

7.1 Moonee Ponds Creek Westmeadows

Investigate upgrading Westmeadows Reserve to district level play, upgrade Raleigh St playspace, creek trail and improve connections with the Fawcner Street Shopping Precinct.

7.2 Trade Park Reserve

Upgrade to improve social recreation experiences in the western end of the reserve. This will complement upgrade of tennis courts.

7.3 SF Hedger Reserve

Upgrade visitor facilities and locate in viewlines to improve safety. Complement with longer term design to open up the reserve for greater visibility and use.

7.4 Gladstone Park Reserve

Upgrade with picnic facilities and trees. Design to support walking across the park to the Gladstone Shopping Centre.

7.5 John Coutts Reserve

Upgrade with a variety of play and picnic facilities. Design will consider hosting events and provide extensive tree shading.

7.6 Oasis Areas

Oasis areas are planted to achieve 70% canopy cover by 2050. For example

- Carrick Drive Reserve
- Lackenheath Drive Reserve
- Walpa Reserve

GROW

Prioritising land for open space starts with identifying the gaps

7.7 Open Space Gap Area - Tullamarine

Investigate options to help resolve shortage of quality open space in Tullamarine.

7.8 Open Space Gap Area - Gladstone Park

Investigate feasibility of a park south of Gladstone Park Shopping Centre. Park would be located to encourage more people to walk to the shopping centre by linking cul-de-sacs and be well shaded.

7.9 Access along Tattenham Ct and Trinity Blvd

Advocate to Melbourne Water to enable access along Tattenham Court and Trinity Boulevard, Attwood for residents walk the edge of Moonee Ponds Creek Parklands. This will help address the nearby gap area.

7.10 Leo Dineen Reserve

Investigate options to expand Leo Dineen Reserve to increase space, and improve access and walking routes for residents.

7.11 Attwood Creek conservation

Investigate and if feasible apply environmental controls or management of significant remnant, mature Grey Box Woodland on both sides of Attwood Creek in the green wedge zone.
